

IGS is a niche wholesale reseller of IT hardware parts and complete systems. We are boutique repair service center for DEC, HP AlphaServer systems and Vax Systems as well as Apple computers. We are proud of our history as successful marketer for Compaq, HP and Vax. Our long-term, successful relationship with the U.S. Navy demonstrates our company's reliability and innovative nature. During our 20 years in the reseller business IGS has diversified but never lost sight of our core mission to serve every customer well. "This is what we've cut our teeth on from day one: service excellence," says IGS founder Bobby Ahearn.

In addition to dominating the DEC/HP/Compaq world, IGS leads the wholesale reseller field as a multi-vendor supplier that cultivates partnerships with a wide array of manufacturers, including IBM, Sun, NetGear, Apple and 40 others.

IGS customers include Fortune 500 and Fortune 100 companies. They expect efficiency and excellence. Our 24/7 shop delivers!
